This drawing is to be used for planting information only, and is subject to alteration through changes to the site layout or until approved by the Area Designer.

Any species substitution by the contractor must be notified, with the Landscape Workplan through the Job Architect.

This issue must be checked in accordance with NEC Standards 2016 (Chapter 4.2), Building New Works for Highways, 2016 (Chapter 4.2) and (Chapter 4.3) by the Regional Engineer prior to implementation.

Excavations: Contractors must ensure that they have full information relating to service and drainage below ground levels.

Root barriers to be used in association with tree planting adjacent to sewers / services / footpaths etc. commercialzed products or similar application, in accordance with manufacturer's instructions.

NOTE

For planting specification refer to 1477 A2 06.

For planting details of hedges and tree planting refer to 1477 A2 04.

In areas where trees or hedgerows are to be planted adjacent to the proposed rising main or it’s easement, a root barrier should be installed over the rising main. All trees are located outside of easements to reduce conflict but root barriers are advisable.
